

Proceedings of the First Brazilian Symposium on Mathematical and Computational Biology

- Preface
- The Minimal Surface Structure of Biomolecules
R. Mondaini
- The Brain as an Excitable Medium - An Experimental Approach
V.M.F. de Lima, J. Bennaton, W. Hanke
- Extragenic Palindromes: the Identification of Genes and Regulation of the SOS DNA Repair Regulon of Escherichia coli K-12
D. Fontoura de Almeida
- Application of Mathematical Models of DNA Sequence Evolution in Experimental Phylogenetics and Studies of Trypanosoma cruzi Genetic Diversity
M.R.S. Briones, G.F.O. Sanson, S.Y. Kawashita, R. Amino, A. Brunstein. B. Zingales
- Health Informatics Education: Onsite and Online Instruction Project - Preliminary Results
L. Ohno-Machado, H.F. Marin, E.P. Marques. E. Massad, R.A Greenes
- Linear Regression Modelling of Infant Mortality in Brazilian Municipalities according to Different Predictor Selection Strategies
R.M.V.R. Almeida, R.C. Gismondi, A.F.C. Infantosi
- Comparative Biology and Intuitive Set Theory
N. Papavero
- Differential Geometric Modelling in Trophodynamics
S.F. Rutz
- Type SIS Epidemiological Model with Subjective Parameters
R.C. Bassanezi, L.C. de Barros, R.Z.G. de Oliveira, M.B.F. Leite
- Quantum Models of Mind and Quantum Brain: Are they Compatible with Environmental Decoherence?
L. Pinguelli Rosa
- An Invitation to Research on the Mechanics of Folded Media: Application in Biomechanics and Geophysics
L. Bevilacqua
- Metastability: An Emerging Property of Icosahedral Viral Capsids?
F. Portela Câmara
- Creativity and Delusions: The Dopaminergic Modulation of Cortical Maps
L.A.V. de Carvalho, D.Q. Mendes
- Mathematical Foundations of Microswimming
J. Koiller
- How to Model Blood Flow in Distensible Vessels
A. Di Carlo, P. Nardinocchi, L. Teresi
- On the Three-Stage Dynamics of HIV Infection
R.M. Zorzenon dos Santos, S. Coutinho
- Nonlinear Dynamics in Ecology
A. Hastings (available at <http://www.biomat.org/isbbmc>)
- Index
